-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Objections***

1. Claims 4-14 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only and cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Hiew et al (US Patent No. 6,740,312 B2).

The reference teaches, in example 1, a titanium dioxide pigment coated with 19% SiO<sub>2</sub>. According to the example the BET surface area is 140 m<sup>2</sup>/g.

The instant claims are met by the reference. With respect to claims 2 and 3 these limitations appear to be an inherent features absent evidence to the contrary since the process for producing the particles are similar.

### ***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The preamble of claim 3 is inconsistent with that of claim 2 as claim 2 is not drawn to aggregates but rather a power. The phrase "the silicon dioxide coatings" lacks proper antecedent basis.

### ***Specification***

6. The abstract of the disclosure is objected to because it is not found on a single page free of extraneous information. Correction is required. See MPEP § 608.01(b).

7. The disclosure is objected to because of the following informalities: There is no Brief Description Of The Drawings section found in the specification. Appropriate correction is required.

***Information Disclosure Statement***

8. The references cited have been reviewed by the examiner and are considered to be cumulative to or less relevant than the prior art reference relied upon in the above rejection.

***References Cited By The Examiner***

9. The references cited by applicant have been considered however they are not seen to teach and/or fairly suggest the instant invention. US 2005/0183634 and US 2006/0116279 teach similar compositions however based on their effective filing dates they cannot be used as art to teach and/or render obvious the instant claims.
